

RebMan

Retail Business Manager –2008 (ERP)

System Overview

In the new Retail Era... increasing customer demands in the marketplace and the desire to increase profitability have changed the way Retailers need to do business. However, thanks to new technology tools available today, the picture gets better and better for any size Retailers. They can maximize customer service, increase inventory turn over, and increase profit with the power of **RebMan™**.

RebMan™ allows owners to manage their business more efficiently—not only to stay in business and compete, but also to grow. It is an intuitive and easy to use total business automation and management system. It will help you to manage your operations more efficiently, so you can save time and money

RebMan™ is an end-to-end online solution for any size Retailer. 'End-to-end' means that all aspects of operating a Retail business are covered: from inventory control, purchasing management, point of sale transactions including flexible & variety of transaction options; customer management including customer history and frequent buyer programs; to flexible store coupons, to complete MIS functions including security control and more. Options include complete RF (radio frequency wireless terminal) integration, electronic credit/debit card and check authorization, multiple inventory, Multiple Branch, Web Enabled and EDI (Electronic Data Interchange).

RebMan™ is a true 32-bit architecture Windows client/server application that can operate on any hardware platform; from standard PCs including those from IBM, Hewlett-Packard, Dell, Gateway, and assembled; to standalone POS terminals from IBM, NCR, Epson, Fujitsu, Siemens - Nixdorff etc.

Let's take a look at what **RebMan™** can do for your business.

- Inventory Control
- Purchasing Management
- Point of Sale Functions
- Customer Management
- Marketing
- Manager Control (MIS)
- RF Integration Option
- Barcode / RFID Technology
- Headquarters
- Financial Accounting
- Asset Management
- Merchandise Planning and Analysis

Now you can have the best of both worlds: POS & HQ

- Centralized control of your multi-store retail operation
- Deeper insight into business intelligence.
- You'll have the ability to control costs, maximize revenue streams, build profitable customer relationships, and improve efficiency and accountability across the board.
- Streamline business operations, including inventory and point-of-sale processes. Integrated credit card and debit card transactions.
- Real time information at HQ and stores: detailed sales and inventory data, Manage prices, purchasing, and inventory for each location.
- Set and monitor policies and procedures, pricing, promotions for every store centrally.
- Allocation and replenishment of Inventory.
- Reduce Stock outs and improve merchandise availability.
- Narrow down Inventory to Sales Ration
- Avoid over stocking.

Theft and Loss Prevention

RebMan™ has the theft & loss prevention features you need to dramatically reduce shrinkage, lock down the system, capture events behind the scenes and prevent employee and customer, employee and supplier fraud.

- Audit trail
- Reason codes
- Behind the scenes capture of events
- Detailed associate performance
- Permissions, including robust security settings, with finger print of authentication of employee doing transactions.

CRM (Customer Relationship Management)

Creating brand-loyal customers is a goal of every retailer.

- Customer data capture
- Customer segmentation
- Customer scoring and binning
- Customer loyalty programs
- Target mailings to your customers' special interests. Grant automatic discounts and differential pricing to special customers.

Quantity (A+B+C)	Price	Amount	Discount	Net Price	Total Price
1.00	45.00	45.00	0.00	45.00	45.00

Embedded accounting and Asset Management

RebMan™ accounting functions are embedded and allow transactions to flow through to accounting as they occur. It gives accurate cost and quantity supporting for all costing methods, and provides an audit trail detailed to the item level. It also supports recurring variable payments. Also it keeps track of Asset depreciation and its calculation with posting to GL.

Inter-store transfers

RebMan™ controls all 3 steps of transfer – Transfer-out, In-transit, Transfer-in. It captures any discrepancies and substitutions, with discrepancies resolved in one manual step or with reset rules for "auto-resolution." A flawless transfer audit trail is preserved. Stores can be replenishing with requisition, issues and receipt procedures.
