

Asset Information Management

ASIM is Asset Tracking Software designed to **control** and **manage** mobile and **fixed assets**.

ASIM centrally manages; what assets you have, where they are, who uses them, and all costs associated to the items.

ASIM is a comprehensive asset tracking solution with **extensive bar coding and numerous Radio Frequency Identification (RFID) technologies and functions**.

Asset Management - Lifecycle Tracking::

- Receiving and Asset Data Collection into Mobile Device or PC Software.
- Deployment - assigning the assets.
- Fixed Asset Software - Inventory
- Maintenance and Asset Warranty
- Auto-Discovery Interface
- Depreciation and Disposal

ASIM Asset Tracking Software Benefits

Track Maintenance and Expenses for each asset

- Track Asset Ownership. ASIM can automatically create log entries describing any changes in Status, Assignment or movement to
 - new location
 - or department.
- Keep track of all expenses associated with an asset such as repairs.
- Eliminates paper work and organizes records.

Calculate Monthly & Annual Depreciation Schedules

- Support for Straight-Line.
- Month of Fiscal Year End can be changed.
- Several useful Depreciation Report templates, including Depreciation for Year & Depreciation for Month reports

Scan & Print Barcodes

- Associate a barcode with an asset simply by scanning the barcode with the cursor in the barcode field.
- Retrieve the asset record later by scanning the barcode again.
- Find missing assets with the Asset Audit Wizard. Simply scan the barcodes of all assets in a particular location or department.
- The Asset Audit Wizard will show found and missing assets.
- ASIM can work with all barcode scanners, whether they connect to your computer using a keyboard wedge, USB or via wireless connection.
- Barcode scanners that store data in memory can also be used. Simply export the stored scanner data to a text file and then import the file.

Additional Features

- Handles multiple locations.
- A powerful Run Report Using feature lets you run reports using only data from the currently selected location, query, department, etc..
- Import delimited text files and Microsoft Excel spreadsheet data into ASIM.
- Export data to HTML, Access database or an Excel spreadsheet.
